DRDGOLD AND MINTAILS LIMITED ANNOUNCE EAST RAND GOLD TAILINGS TREATMENT JOINT VENTURE AND AGREEMENT WITH ANGLOGOLD ASHANTI LIMITED

DRDGOLD and Mintails Limited (ASX: MLI) today announced the formation of a new joint venture ("the JV") between Mintails SA (Pty) Limited ("Mintails SA"), a wholly owned subsidiary of Mintails Limited, and DRDGOLD South African Operations (Pty) Limited ("DRDGOLD SA"), which is 74% held by DRDGOLD with the balance being held by its BEE partners, Khumo Gold SPV (Pty) Limited and an employee trust. The JV has acquired from AngloGold Ashanti Limited ("AngloGold Ashanti") significant gold-bearing tailings materials created from historic gold production and remaining infrastructure surrounding ERGO, a surface reclamation operation on South Africa's East Rand goldfields which was discontinued by AngloGold Ashanti in 2004.

It is envisaged that the JV, together with the additional tailings resources and infrastructure acquired from AngloGold Ashanti, will create significant potential for the processing of surface gold tailings on the East Rand goldfields.

Over its 25-year history, ERGO processed more than 890 million tonnes of tailings material on the East Rand and produced approximately 8.2 million ounces of gold through two plants, Brakpan and East Daggafontein. These two plants were purchased by Mintails SA in 2006.

Following discussions initiated in the first quarter of 2007, the JV parties agreed to pursue a strategy to consolidate certain of their assets on the East Rand. Mintails SA will contribute one fully refurbished CIL circuit at the Brakpan plant and DRDGOLD SA will contribute the Elsburg Tailings Complex, comprising approximately 180 million tonnes of tailings.

Mintails SA and DRDGOLD SA will each own 50% of the JV. The JV will be managed by Crown Gold Recoveries (Pty) Limited, a subsidiary of DRDGOLD SA, which has treated more than 200 million tonnes of sand and slime and produced approximately 2.8 million ounces of gold through its plants.

The initial phase of the project envisages the refurbishment of one CIL circuit at the Brakpan plant which will have the capacity to treat an estimated 1.25 million tonnes of tailings per month. This is dependent on the outcome of the current drilling and testing evaluation. Depending on the outcome of the feasibility study, it is possible that the first gold production could commence within 24 months. The process will involve the treatment of tailings from the Elsburg Tailings Complex through the Brakpan plant with residue being deposited on the East Daggafontein deposition site.

The JV has entered into a Sale of Assets agreement with AngloGold Ashanti in terms of which the JV will acquire the remaining moveable and immovable assets of ERGO. These assets will be operated by the JV, for its own account, under the AngloGold Ashanti authorisations until new order mining rights have been obtained and transferred to the JV. These assets, comprising servitudes (access agreements), infrastructure, piping, equipment and the right to an additional 15 million tonnes of tailings material, provide a platform to consolidate these tailings assets with the Elsburg Tailings.

If certain necessary criteria are met, the JV parties consider that the consolidation and treatment of these remaining surface assets on the East Rand could provide significant potential value-add to the JV and to the respective participants.

On 26 April 2007, Mintails and DRDGOLD announced the formation of a separate joint venture company to explore, evaluate and potentially mine gold and uranium by open cast and underground mining methods on the West Rand. This West Rand joint venture is a distinct and separate entity from the JV described above. The West Rand joint venture is expected to list as a new company on the Australian Stock Exchange in due course, once the Initial Public Offering is completed.
